Managed Email Security

Deploy managed email security to protect yourself against spam, ransomware, malware, business email compromise, spear phishing, and account takeover. Our email security solutions monitor your emails for malicious content, blocking risky senders and domains to minimise attack risks.

Malicious actors see your team as your weakest link and use your email communication as an effective way to breach your defences. Given the threat, it makes sense to deploy security tools to protect your operations and data.

Managed email security is an essential component of a comprehensive cybersecurity strategy, delivering advanced protection and peace of mind in the face of constantly evolving email threats.

When looking at managed email security options, it is important to consider the following:

- **Integration** - The solutions needs to integrate with your chosen email platform and other infrastructure choices.

- **User Experience** - Like all solutions, it needs to work effectively while not adding a lot of complexity for your team.

- **Customisation** - The solution should be able to accept different policies and controls based on your organisational needs.

- **Support and Updates** - With threats constantly changing, your email security solution needs to be able to adapt to those threat vectors.

Rely on us to deploy the most appropriate email security solution for your email security needs.

Managed Email Security **Benefits**

Enhanced organisational security and reduced risk

Managed Email Security provides you with robust protection against a wide range of email threats, reducing the risk of breaches, business disruption and data loss.

A cost-effective security layer

Your return on investment deploying a managed email security solution is high, giving you great protection for a relatively low price point. By adopting a managed service, you do not need to worry about expensive subject matter experts for management.

Built in scalability

Email security solutions can scale to accommodate a growing team easily and effortlessly.

Regulatory compliance and insurance compliance

Email security is seen as a core component of any cyber defence. By adopting a managed service, you can comply with regulations such as GDPR, HIPAA, and others by ensuring secure and compliant email communication. You can also make a case for driving down your insurance premiums.

Protect your corporate email from email cyber security threats.

Our experienced cyber security team will ensure your team are continuously protected.
