IT Services > Managed Cyber Security Services > Managed Microsoft 365 Backup

Managed Microsoft 365 Backup

You rely on Microsoft 365 as your productivity platform of choice. Reliably backing your data up protects you against malicious cyber threats and user error.

While Microsoft 365 offers some level of redundancy and data protection, it does not include comprehensive backup and recovery features, making managed backup services essential if you need to ensure your data is fully protected against loss, corruption, accidental deletion, or malicious attacks.

As cyberattacks become more frequent and destructive, having reliable, independent cloud backups of key Microsoft data across Exchange, OneDrive, SharePoint, Teams and more should provide you with added peace of mind that you are protected.

Backups also protect you from other forms of data loss, such as end-user error, malicious activity, accidental overwrites and cancelled account subscriptions.

Our managed Microsoft 365 Backup services take multiple backups per day to allow for a fast and flexible recovery should the worst ever happen. This helps with your data compliance by providing you with proven business continuity and security.

Our managed Microsoft 365 Backup service delivers:

- Trusted backups automatically carried out at least 3 times per day.
- Fast and effortless restore capabilities.
- Effective monitoring and backup management.
- Added data protection for compliance.

As a managed service, we take responsibility for backing up your data, allowing you to focus on other priorities confident in the knowledge that you are protected.

Managed Microsoft 365 Backup **Benefits**

Reduced risk and increased resilience, allowing you to quickly recover from data loss

With a non-destructive restore process, you can quickly recover from data loss at an organizational, user, or object level.

Improved data protection and compliance

You can choose different data retention options based on your particular data retention needs. This reduces your risk of non-compliance penalties.

Lower cyber security insurance premiums

With the cost of cyber-breaches increasing all of the time, through ransom-ware payments and remediation, demonstrating to your cyber insurers that you have proven backups can help lower your risk and your subsequent insurance premiums.

You and your organization have better protection against cyber security threats

With automated backups in an independent cloud service carried out multiple times per day, you know that key data held in your Microsoft environment is protected should the worst happen. This prevents data loss caused by accidental deletion, malware, ransomware, or malicious insiders and ensures that your important business data can always be recovered.

Ability to granularly restore from a specific point in time

We can quickly restore or export data from a specific point in time before a data loss occurred, protecting you from a host of malicious action. That can be organization-wide, or down to specific accounts or files.

Simplify the task of backing up your organisational data.

Relax knowing that your key organizational data is always protected.

Discuss your managed Microsoft 365 backup needs by calling us on **+1 323 984 8908**, or emailing **hello@cardonet.com**

cardonet

Managed Microsoft 365 Backup **Features**

- Automated, continuous backups based on your organizational needs.
- Quick point-in-time restore and export.
- A non-destructive restore process, keeping related fields and file structures intact.
- Cross-user restore, allowing data to be transferred from one account to another.
- Granular recovery, with easy export of entire accounts, or specific files.
- Longer term retention of your data.
- Encrypted data backup both in transit and at rest.
- Scalable to your changing needs.
- Extensive monitoring and reporting capabilities to prove backup success.
- Helping you comply with required industry backup standards.

Managed Microsoft 365 Backup **Options**

- A variety of retention times and options, based on your needs.
- Different disaster recovery options.

Our Technology Partners

Allowing you to do more

- Confidence and peace of mind knowing your business data is secure.
- Focus on your day-to-day, knowing that your data is safely backed up.
- Satisfy your business, industry and regulatory compliance requirements.
- Give your stakeholders confidence that your data is secure.
- Satisfy insurance provider requirements and reduce your insurance premium costs.
