Managed Vulnerability Scanning

Vulnerability scanning is designed to identify, assess, and remediate security weaknesses within your IT systems and networks. It is an automated process that scans your systems, network, and applications for known vulnerabilities.

As a critical component of a solid cyber security strategy, vulnerability scanning identifies security vulnerabilities within your organisation's IT infrastructure and then, as part of vulnerability management, goes on to identify, evaluate, treat, and report on security vulnerabilities in your systems and software.

Vulnerability Scanning and Management are essential practices for maintaining a strong security posture, protecting yourself against cyber threats, and ensuring your compliance with regulatory and cyber insurance requirements.

When looking at vulnerability scanning and vulnerability management options, it is important to consider the following:

- **Integration** - The solutions needs to integrate with your existing IT platform and infrastructure investments.

- **Customisation** - The solution should be able to adapt to your particular needs.

- **Scalability** - The solution should be able to scale as your organization grows and your network changes.

- **Support and Updates** - With threats constantly evolving, your vulnerability scanning and vulnerability management solution needs to be able to adapt to those threat vectors.

Rely on us to deploy the most appropriate vulnerability scanning and vulnerability management solution for your cyber security needs.

Managed Vulnerability Scanning **Benefits**

An improved cyber security posture

Vulnerability scanning and vulnerability management proactively identifies and addresses vulnerabilities within your systems or on your network before they can be exploited by attackers.

Easier regulatory compliance

Deploying a vulnerability scanning and vulnerability management solution will help you comply with security standards and regulations like PCI-DSS, HIPAA, and GDPR. It will also help you comply with the latest cyber insurance requirements.

Reduced risk and cost savings

You can reduce the risk of data breaches and other security incidents by addressing potential weaknesses identified by continuous vulnerability scanning. By preventing cyber breaches, you avoid costly security incidents and reduce your need for expensive emergency response efforts.

Improved operational efficiency

Modern vulnerability scanning and vulnerability management solutions streamlines the process of managing vulnerabilities, making it easier to maintain a secure environment for your organization.

Protect yourself with robust vulnerability scanning and management.

Our experienced team will deploy and manage your solution to help keep you protected.

Discuss your managed vulnerability scanning needs by calling us on **+44 203 034 2244**, or emailing **hello@cardonet.co.uk**

cardonet

Managed Vulnerability Scanning **Features**

- Identification of potential security weaknesses.
- Evaluation of the severity and potential impact of identified vulnerabilities.
- Prioritization of vulnerabilities based on risk.
- Help with remediation plans.
- Verification of fixes to ensure mitigation.
- Records of vulnerabilities, remediation efforts, and result verification.
- Reports to ensure continued improvement.

Managed Vulnerability Scanning **Options**

- Different scan types - network, web application, host-based and database.
- Scan frequency - scheduled or continuous.
- Reporting.

Allowing you to do more

- Stay on top of your cyber security with proactive scanning.
- Remove the worry of cyber security threats.
- Protect your operation from cyber threat.
- Lower your cyber insurance premiums.
- Reduce the chance of downtime and cost of recovery.
- Reduce your risk.
- Easily keep compliant.
- Give your stakeholders confidence that you are protected.

CYBER ESSENTIALS

Crown Commercial Service Supplier

Our Commitments

Our Team
We employ friendly professionals who have well-rounded experience, the ability to work in a team and a desire to be helpful.

Our Processes
We continue to invest in our systems and have the standards in place for effective, streamlined and consistent service, customized to meet your needs.

Our Mission
We are dedicated to providing remarkable IT services that improves your performance, increases your productivity and protects you.

Our Promise
We value long-term relationships built on trust. To achieve that, we deliver fully supported vendor neutral solutions that are essential and reasonably priced.
